

EMP P/N - 14056

Kawasaki KRX 40" LED Light Bar Brackets
Fits: 2019-21 KRX 1000

Includes:

1. (2) Brackets (RH and LH)

Hardware Kit:

1. (4) 1/4-20 x3/4" Flange Head Bolts (can not be longer)
2. (4) 1/4-20 Expansion Nuts
Rubber
3. (4) 3/8" Internal Tooth Lock Washers
4. (4) 1/4" Flat Washers-Black
5. EMP® Logo Decal

Tools Needed:

1. 1/2" Dill Bit
2. 3/8" Socket
3. 3/8" Open End Wrench

Installation should be performed by a certified technician.

Installation:

1. Set vehicle parking brake.
2. With assistance from a helper, hold the brackets and light bar in place to insure you have a light bar that will work with the brackets. (See note below)
3. Using the 1/2" dill bit drill out the front two octagon shaped holes in the cage. Only the front two on each side.
4. Slide the rubber expansion nuts into the holes.
5. Bolt the brackets to the cage using the bolts provided.
6. Bolt your light bar to the brackets. You can use the internal tooth lock washers between the light bar and brackets. This will help to keep the light bar from rotating.

Note; This bracket set is designed to work with a light bar with an outside dimension of 40-1/4" to 42". The brackets can be bent a little by hand to accommodate a slightly larger light.
